

3U Rackmount Chassis with 6 Drive bays, supports microATX motherboard and PS2 or SFX PSU

Introduction

The RCK-306M is a 3U Rackmount chassis which is designed with a depth of 400mm only, thus providing an ideal solution for those applications where the chassis depth can make or break a project. The RCK-306M can fit a PS2 or SFX size power supply which is much cheaper compared to the ordinary 2U power supply. As such user can have more flexibility in choosing the power supply for this chassis. The chassis can be integrated with micro ATX or mini-ITX motherboard. RCK-306M supports up to four 5.25" and two 3.5" external drive bays. The RCK-306M maintains a balanced internal temperature with an 60mm ball-bearing fan with space for one additional 60mm fan.
