Introduction

The RCK-416M/B is specifically designed for harsh environment applications. It has very short depth and 1.6mm chassis thickness, RCK-416M/B provides a high capacity of two 5.25" Drive bays and three 3.25" Drive bays, suitable to contain large amount of data. It is easily configurable to support either an ATX Motherboard or a 14-slot backplane by simply changing the rear panel. The RCK-416M/B maintains a balanced internal temperature with an 120mm ball-bearing fan. A PS2 or Mini-redundant power supply ensures a minimum amount of system down time. RCK-416M/B is also suitable for RAID application that meets the needs of small and large companies.
